Who We Are

Located in the heart of Minnesota, The Outdoor GreatRoom Company™ (OGC) manufactures unique, upscale products with design appeal for outdoor living spaces. Products include gas fire pit tables, Crystal Fire® Plus burners and burner inserts, outdoor kitchen islands, outdoor gas fireplaces, outdoor patio furniture, accessories, and custom products for residential and commercial applications.

What We Do

The team behind The Outdoor GreatRoom Company was the first to enter into the gas fire pit category, positioning OGC as the experts on outdoor fire. We are U.S. manufacturers and all of our Crystal Fire® Plus burners and gas fire pit tables are UL and ULC listed for safety.

Our Promise

Let The Outdoor GreatRoom Company help to define your outdoor experience. We set the trends outside as your one-stop-shop for safe products, reliable and friendly service, and innovative technology. From concept to design to delivery, we will ensure your style doesn't stop at the door. Distinctive products for a distinctive lifestyle. Bring home outside.

Our Mission

To bring family and friends together by redefining the home living experience through innovative products and people.

History

In 1975, Dan and Ron Shimek had an inspiration for indoor gas fireplaces that changed an industry and became the foundation of Heat-N-Glo®. Brothers Steve and Gerry joined them and the rest (including over 50 patents) is history. But the Shimeks were never ones to dwell on the past. That inspiration led Dan to launch the first company of its kind in 2003: The Outdoor GreatRoom Company — a company dedicated to an exciting new concept “the outdoor greatroom.”

Why OGC?

OGC is focused on bringing the best and safest product to the market. That's why we have a team with over 20 years of experience manufacturing products in the outdoor living category, and we continue to introduce the best and most innovative products year after year.

Crystal Fire® Plus Burner Technology

The safest and most reliable in the industry.

UL, ULC, & CE Listed

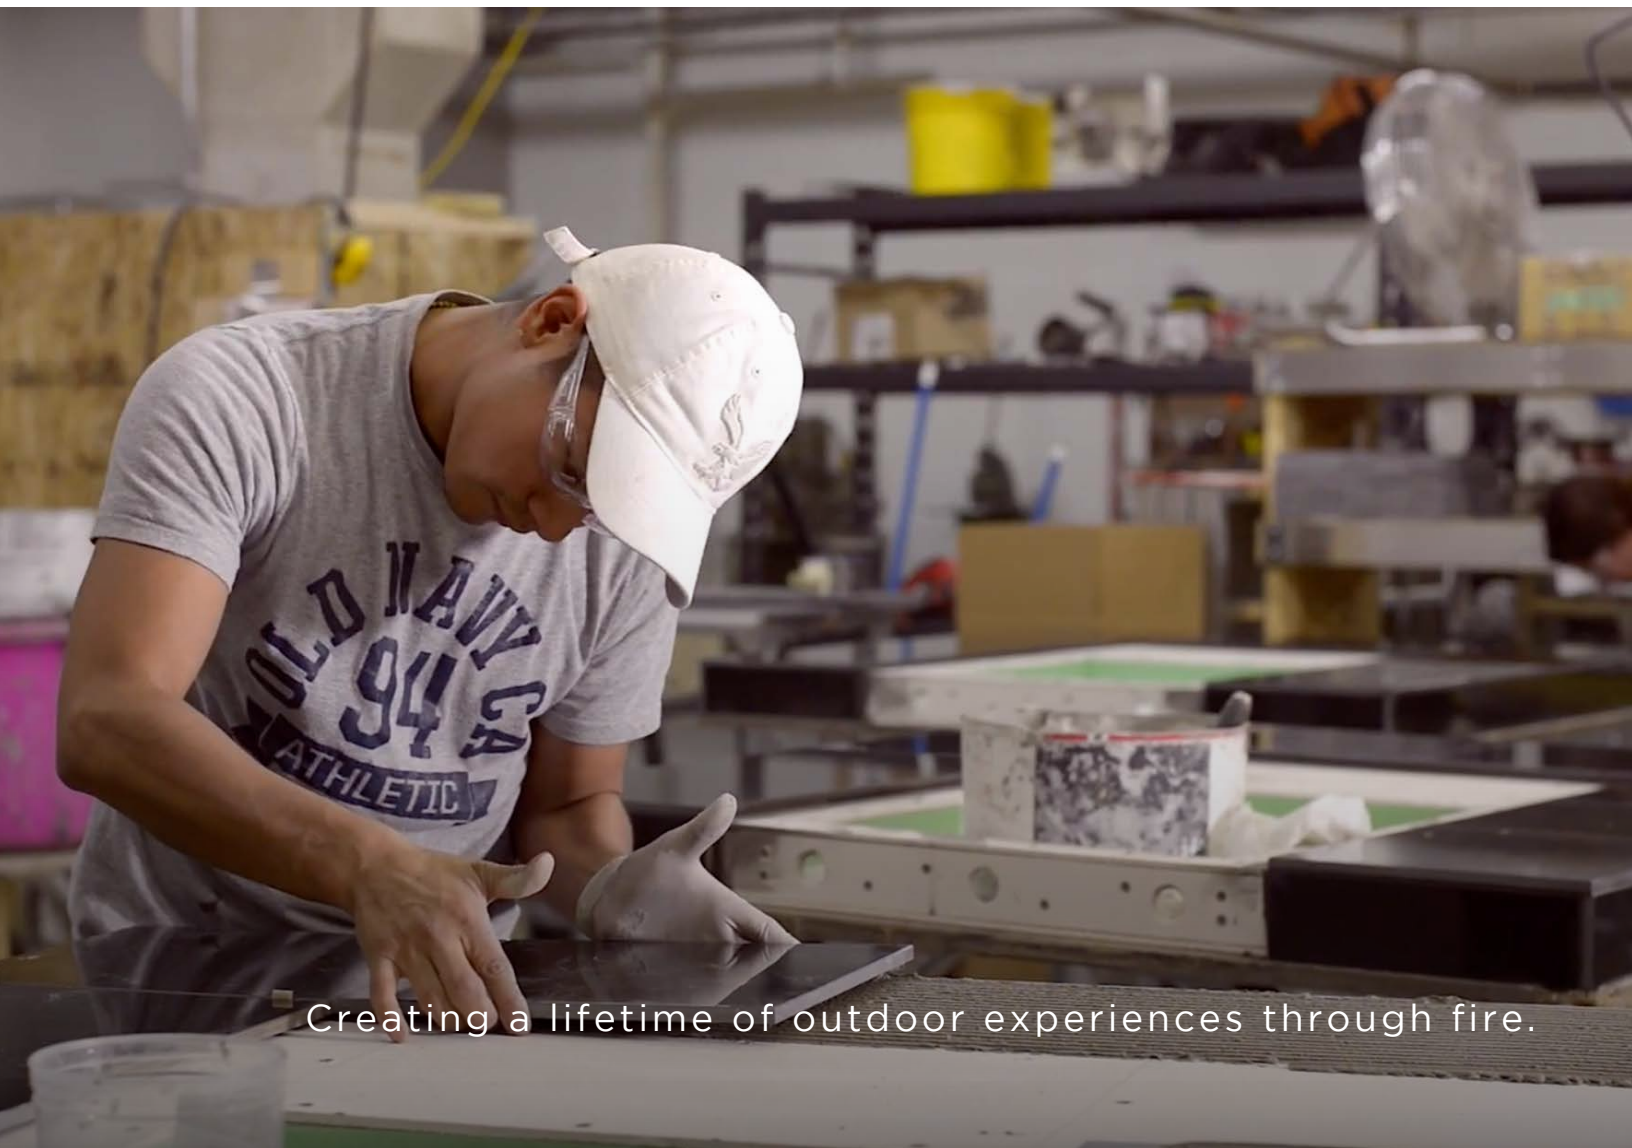

Tested for safety and quality.

Design-Forward Products

Handcrafted in Minnesota from durable, outdoor-rated materials.

We're Like Family

We provide exceptional customer service and reliability.

Creating a lifetime of outdoor experiences through fire.

“We have had a great relationship with The Outdoor GreatRoom Company over the years. Their fire tables have always been trustworthy, excellent quality, provided real heat, and we feel very confident recommending and selling them to our customers.”

—Ashley from Barbecues Galore, customers since 2007

| GAS FIRE PIT TABLES

Gas Fire Pit Tables

Light up the night with a cozy, stylish gas fire pit!

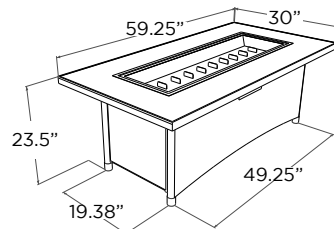

Every table includes our patent-pending Crystal Fire® Plus burner technology for the best and safest experience. Add an electronic ignition system to any table for commercial use. All fire tables include clear tempered glass gems.

Stylize your outdoor room.

"We have been working with The Outdoor GreatRoom Company for over 13 years because of the people that make up OGC. Their down to earth, top notch professionals design and build reliable indoor and outdoor features sure to enhance anyone's space."

—Wayne from Fireplace Stone & Patio, customers since 2008

| READY-TO-FINISH

Ready-to-Finish Fire Pit Kits

Be the visionary for your very own fire pit design!

We supply the structure, and you finish your masterpiece on-site to match your landscaping or exterior design. Ready-to-finish fire pit kits are made from Hardiebacker® fiber cement boarding and G90 steel framing.

Finished Linear Kit

- Made of G90 marine-grade galvanized steel framing and Hardiebacker® fiber cement boarding
- Choose between manual ignition (VCSV) or direct spark ignition (DSI)
- Includes aluminum top, burner insert, two ventilation plates, and standard control panel
- Control panel will either have turn dial or switch depending on ignition type
- Other DSI controls, timers, e-stops, and fire media sold separately
- Recommended for hard piped natural gas or liquid propane installation
- **Custom sizing available** — contact OGC for more information.
- Most do not fit 20 lb. liquid propane tank in base
- Made in USA

See page 34 for custom capabilities.

Square kit with included components.

CFT-GLASS

LAZY SUSAN RING

Burner Covers

Turn your beautiful fire pit into a functional table by covering the burner with one of our stylish burner covers. Covers also add an extra layer of protection from rain and debris when not in use.

- Grey glass burner covers are included with most fire pit tables; available for all burner sizes
- Select Supercast™ tables come with matching Supercast burner covers
- Add a stainless steel burner cover to CV-54, CV-72, or other select linear models
- Add a lazy susan ring or black glass cover to any of our 20" round burner covers

See page 71 for custom burner cover form.

CVR5132

Protective Covers

Protect your investment with protective covers from OGC! Protective covers are great for storing items long term or for everyday use.

- Available for most fire pit tables
- Tan polyester fabric stays cool to the touch
- Tear-resistant, rip-stop laminating
- Drawstring cord at bottom to secure to fire pit
- Polyester velvet interior protects finished material
- One-way breathability: exterior is water-resistant while being one-way breathable to let any interior moisture out

CV-54 with optional SS54T

Stainless Steel Trim

Compliment the unique look of the 54" and 72" Cove Linear tables (CV-54, CV-72) with this modern stainless steel top.

- Available in two sizes: 54" (SS54T) and 72" (SS72T)
- #304 commercial-grade stainless steel construction
- Adds layer of protection to concrete surface
- Easy to clean

BRON52-K with optional BRON52-CG-TC

Bronson Concrete Tops

Complete your Bronson round gas fire pit kit with an elegant, contemporary concrete top.

- Choose between two colors: Limestone Tan (BRON52-LT-TC) or Charcoal Grey (BRON52-CG-TC)
- Four pieces included with each SKU

Color options available

Limestone Tan
(BRON52-LT-TC)

Charcoal Grey
(BRON52-CG-TC)

"The Outdoor GreatRoom Company has been a great organization to work with over the years. Their exceptional customer service and durable, high-quality products leave strong impressions on the members of our team and the customers purchasing from us."

—Mike from Keller Hearth'n Home, customers since 2006

- Spinning Venturi flame designed to fit any table with an umbrella hole from 1.4"-4"
- Dora brown powder-coated finish
- Easy to assemble
- Single glass cylinder
- Use with 1 lb. propane tank
- For outdoor use only
- Includes black rubber glass lid
- Optional cover (CVRINT) sold separately
- UL and ULC listed

|CUSTOM CAPABILITIES

Custom Finishes

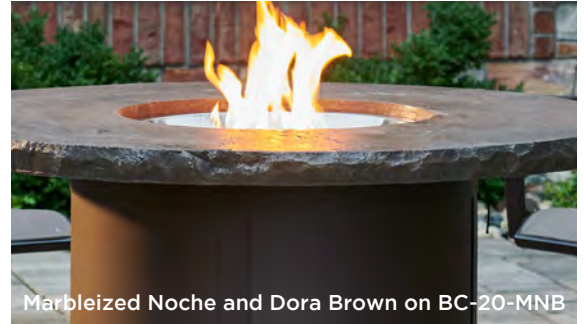

Create a masterpiece that's unique to your living area!
We help you along this exciting journey with our distinctive custom creation process.
Our materials and construction methods are designed to last. Actual finish colors may vary.

Our Custom Process

With our Minnesota-based customer service, design, engineering, and manufacturing abilities, we can help you design, build, and deliver the custom project you've been dreaming of. The process is simple and includes five steps to ensure we do everything correctly.

- 1 Start with something as basic as a sketch, desired dimensions, or material change to one of the many items in our catalog.
- 2 Use our custom request form and fill it out as completely as possible. See pages 67-71 for custom request forms.
- 3 The Outdoor GreatRoom Company (OGC) will provide an estimate for the project.
- 4 A custom rendering will be created (examples above) and submitted to you for approval.
- 5 Once everything is approved, a signed drawing and corresponding purchase order is submitted to OGC to start the creation process.

Custom Fire

Ignite your outdoor living area with a custom fire feature!
We'll work with you on making your dream design come to life.
Perfect for residential, commercial, or multi-family properties.

- Customize many of our standard fire pit tables or create your own unique gas fire pit or outdoor fireplace
- Common materials used are Supercast™ concrete, stucco, metal, tile, and stacked stone (see page 38 for available finishes.)
- Size and shape to fit your design
- Specify desired accessories, fuel type, and other notes in the custom form
- Other upgrades may include LED underlighting, custom glass guards, custom burner covers, and more
- UL and ULC listed Crystal Fire® Plus burners
- Made in USA

See pages 67 and 69 for custom request forms.

Custom Concrete Mantels

Stylize your living room area!

Compliment your already existing fireplace with a custom Supercast™ concrete mantel. Non-combustible mantels allow you to get as close as you'd like to those warm, beautiful flames.

Tavern brown finish on Weathered Barnwood grain

- Non-combustible Supercast concrete mantels
- Two styles: traditional and modern
- Choose between nine Supercast finishes (see page 38 for available finishes.)
- Lengths up to 10' (minimum: 2')
- Made in USA

See page 70 for custom request form.

Custom Outdoor Kitchens

Turn your outdoor dream into a practical reality!

Create your own custom outdoor kitchen and compliment it with your desired outdoor appliances. Choose between a variety of outdoor-rated materials or finish it on your own to match your exterior design.

- Custom kitchens utilize G90 marine grade galvanized steel framing with Hardiebacker® cement board sheeting
- Common materials used are Supercast™ concrete, stucco, metal, tile, and stacked stone (see page 38 for available finishes.)
- Customize your design to include a backsplash, elevated bar, Crystal Fire® Plus gas burner, storage, your favorite grills or other appliances, and more!
- Made in USA

See page 68 for custom request form.

Crystal Fire^{PLUS} 
| BURNERS & KITS

Crystal Fire® Plus Burners

Patent pending burner technology to build the perfect fire!

Crystal Fire® Plus burners are included with every gas fire pit table sold by The Outdoor GreatRoom Company. Purchase separately for custom-built fire pits, fireplaces, or other outdoor installations.

Overmount Style

(burner shown: CFP1242-K with optional GLASS GUARD-1242)

Undermount Style

(burner shown: BP1264-A)

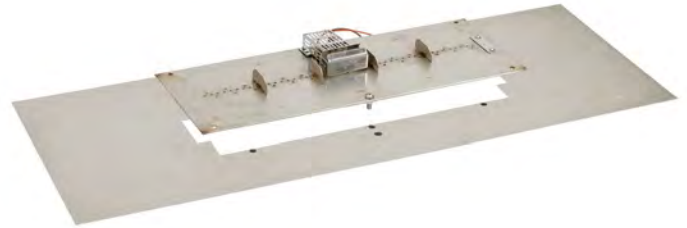

- Burners and burner kits include a variable control safety valve (VCSV), control panel, and clear tempered fire glass gems
- Higher BTU capacity for a brighter, taller, fuller, more yellow flame
- Safety ignition and safety shutdown operations
- "Positive connect" user experience with minimal gas connections for quick installation time
- #304 commercial-grade stainless steel construction
- Safe water drain system through perimeter of the pan
- Comes setup for connection to liquid propane but can be field-converted to natural gas
- Burners and kits above 72" in length include two valves and two control panels
- Installation should be completed by a certified gas technician
- Patent pending
- UL and ULC listed to ANSI Z.21.97-2017/CSA 2.41-2017 standard

See page 47 for contract and commercial burner options.

Controls

VCSV-CP

VCSV-DIY-CP

- If flame is not sensed for any reason, the flow of gas to the burner will safely shut down
- Adjustable flame operation
- Black powder-coated panel with black plastic knob and sparker
- For use with liquid propane or natural gas
- Optional gas key available
- Variable Control Safety Valve System (VCSV-CP) included with every standard table Crystal Fire® Plus burner and gas fire pit table (Dimensions: 6.375" H x 3.5" W)
- DIY control panel for use on custom or hardscape block applications (Dimensions: 9.5" L x 3" W x 4" H)
- Order DIY control panel for use with manual ignition (VCSV-DIY-CP) or direct spark ignition (DSI-DIY-CP)

Ventilation

VENT BLOCK BLACK

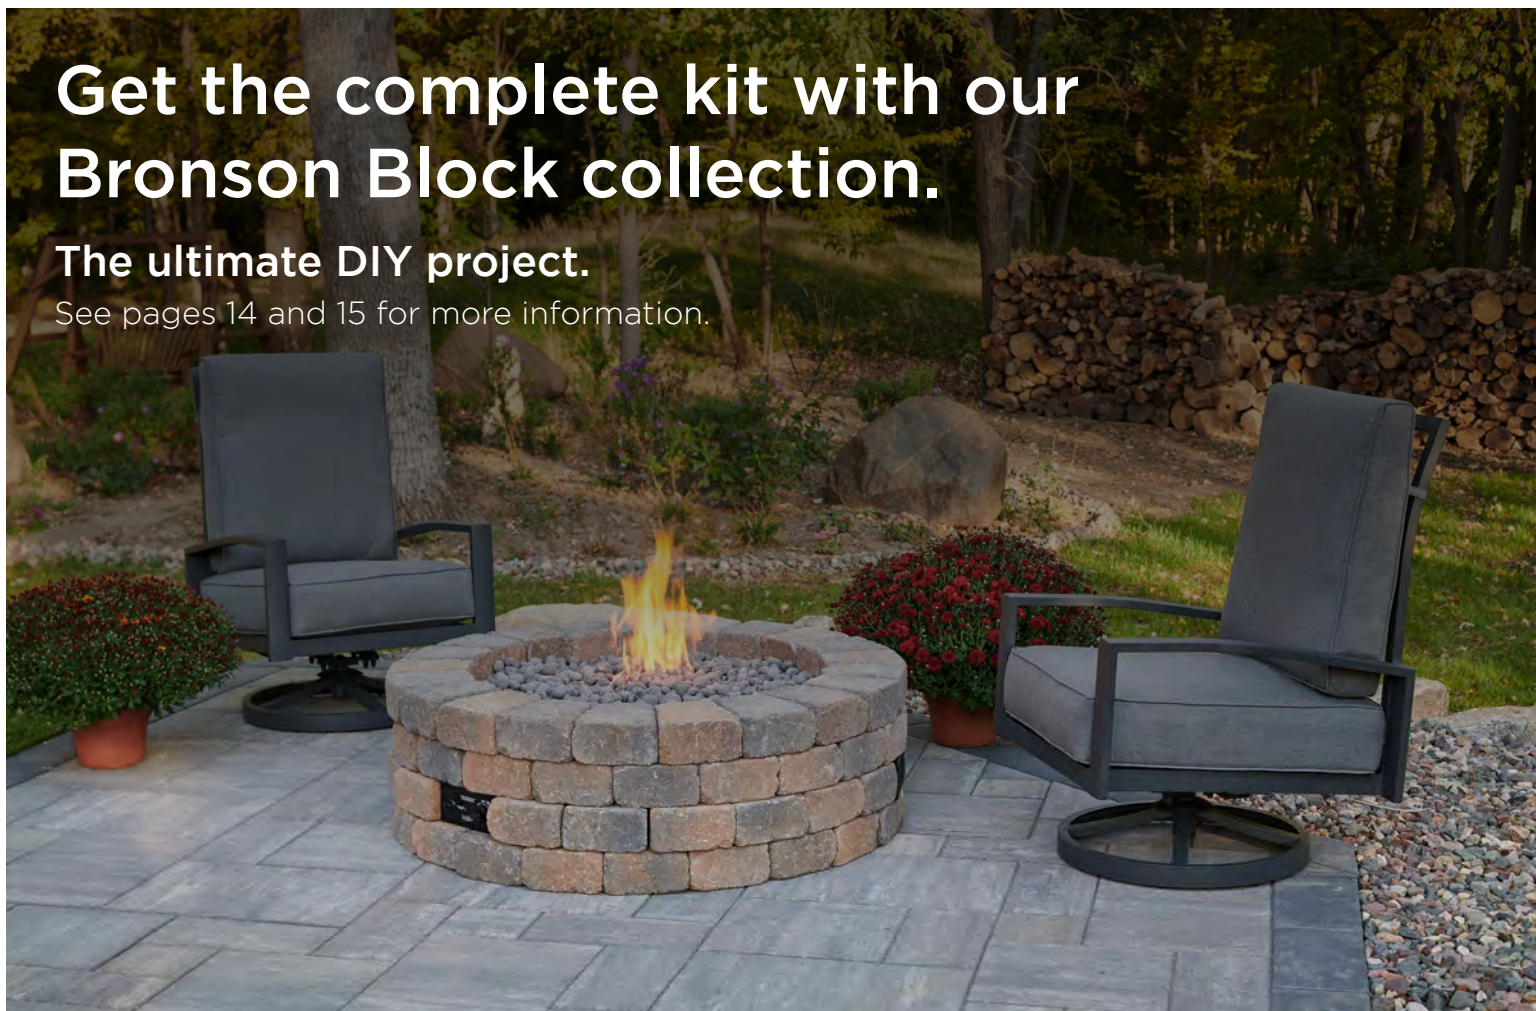

21005

- Crystal Fire® Plus burners require proper ventilation for any DIY or field-installed application
- Black ventilation block (VENT BLOCK BLACK) is made of black powder-coated stainless steel (Dimensions: 8.5" L x 4" W x 4" H)
- Ventilation plate (21005) is made of brushed stainless steel (Dimensions: 12" L x 3" W" x <1" H)

Get the complete kit with our Bronson Block collection.

The ultimate DIY project.

See pages 14 and 15 for more information.

Do-it-Yourself Kits

Take the guesswork out of your do-it-yourself project with these convenient burner kits. Each kit includes everything you need for building the perfect fire pit. Just add brick pavers or other construction materials to make it your own!

- Build your own gas fire pit with a do-it-yourself gas fire pit kit
- Includes Crystal Fire® Plus burner insert, burner plate, control panel, two ventilation blocks, and clear tempered glass gems
- Choose between round or square shapes
- Paver blocks not included
- Made in USA

“The Outdoor Greatroom Company’s fire pits are an absolute show stopper and fit in well with any backyard design. Their customer service with us as a retailer is superb. They are always there to answer questions and provide support when we need it.”

—Harrison from *Imagine Backyard Living*, customers since 2015

Crystal Fire^{PLUS} 

| CONTRACT & COMMERCIAL

Contract and Commercial

Perfect for multi-family residences, hotels, sporting arenas, concert venues, restaurants, and more!

Any Outdoor GreatRoom Company product can be outfitted for contract and commercial spaces.

All commercial burners include a control panel, emergency stop button, clear glass gems and electronic ignition.

Overmount Styles

Undermount Styles

- Direct spark ignition (DSI) system with on/off switch operation
- Flame can be automatically ignited with a single control either on the fire pit or nearby surface
- If flame is not sensed for any reason, the flow of gas to the burner will safely shut down
- DSI system comes set up to run on 110V but can also be used on optional battery operation (CF-DSI-BP)
- Order specific for liquid propane or natural gas (not field-convertible)
- Includes red emergency stop button
- Optional timer, wall switch, Bluetooth® smart app, and other control panel configurations sold separately (see page 52 for control options)
- Ventilation required for field-installed burner enclosures
- Burners and kits above 72" in length include two valves and two control panels
- Installation should be completed by a certified gas technician
- Patent pending
- UL and ULC listed

See page 39 for manual ignition (VCSV) burners.

*Booster orifice available to increase BTU capacity if desired and approved for finishing structure. Glass wind guard required if booster orifice used with any OGC gas fire pit table.

**Burner plate kits include corresponding burner insert and burner plate. Burner insert can be purchased on its own if desired. Contact OGC for burner insert specifications.

Factors to consider when selecting your burner:

- 1 Installation Site:** Is your burner going into an already built surround or will you need a fire table or ready-to-finish base for your burner?
- 2 Burner Mount:** Whether you are looking for a top overmount or bottom undermount application, we have the burner for you. Choose from drop in burners or burner insert and plate kits.
- 3 Installation Opening:** What size and shape is your installation opening? Choose from our stocked burners or burner insert and plate kits to fit your space. If a stocked option is not available, ask about our custom options.
- 4 Operation and Controls:** Do you want controls available for public use or in a more secure, controlled setting? Choose controls, such as a timer, Bluetooth® application, or on/off switch for your application.

Timers

4HRTC

CF-DSI-60MT

- Available in 1-hour and 4-hour options
- Timer replaces controls for direct spark ignition system
- Timer is built into control panel
- Switch bypass (CF-DSI-SB) included with burner for safe and controlled user operation
- Black powder-coated panel with white timer dial
- Dimensions: 6.375" L x 3.5" W

Emergency Stop Button

CFP-ESO-CP

- Immediately shuts off flame when pressed
- Red button included with direct spark ignition system
- Switch bypass (CF-DSI-SB) included with burner for safe and controlled user operation
- Black powder-coated panel with red plastic emergency stop button
- Dimensions: 4.5" L x 2.625" W

On/Off Switch with Emergency Stop Button

WSEP-CP

- On/Off wall switch with emergency stop button
- Replaces controls for direct spark ignition system
- For applications away from the appliance
- Switch bypass (CF-DSI-SB) included with burner for safe and controlled user operation
- Black powder-coated panel with black switch
- Dimensions: 4.5" L x 4.525" W

Timer with Emergency Stop Button

4HRTE-CP

- Four-hour timer with emergency stop button
- Replaces controls for direct spark ignition system
- For applications away from the appliance
- Switch bypass (CF-DSI-SB) included with burner for safe and controlled user operation
- Black powder-coated panel with white timer dial
- Dimensions: 4.5" L x 4.625" W

Bluetooth® Smart App

- Ignite your fire pit or fireplace from your smart device
- Convenient timer automatically turns off the fire
- User-friendly application offers easy installation and syncing process
- Syncs over Bluetooth®
- Available for use with all direct spark ignition systems
- Compatible with iOS™ and Android™
- For residential use only

DSI-SA

Black Wave Gas Burner

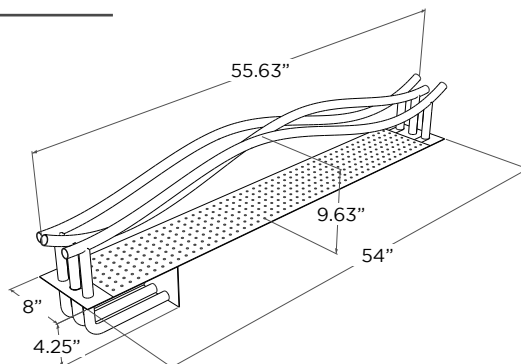

Modern meets innovation with this unique burner design!

The Wave can be installed in custom-built gas fire pits, fireplaces, or other outdoor projects. The three-tubed burner is made from high-quality, black powder-coated stainless steel.

WV-56-LP
WV-56-NG

- Black powder-coated #304 stainless steel
- 54" three-tube burner with black onyx tempered fire glass gems - 150,000 BTUs (LP/NG)
- Includes burner, glass wind guard, ignition system, and glass gems
- Choose between liquid propane (WV-56-LP) or natural gas (WV-56-NG)
- Comes standard with direct spark ignition (DSI)
- UL listed
- Made in USA

“While OGC’s products impress customers, their customer service, business values, and commitment to their retailers impress us the most.”

—Panatda from The Wickery, customers since 2016

INDOOR LIVING

Non-Combustible Mantels

Compliment your gas or electric fireplace with a non-combustible Supercast™ concrete mantel! Supercast concrete is the perfect material for a sturdy, reliable mantel for indoors or outdoors. Mantels are a great spot for displaying décor and adding that extra cozy, personal touch to your fireplace.

- Constructed of non-combustible Supercast concrete
 - Six standard finishes: Midnight Mist, Natural Grey, White, Washed Cedar, Weathered Barnwood, and Tavern Brown
 - Reduced clearances
 - Real wood-look appearance
 - Choose between lengths of 60" or 72"
 - Custom lengths available
 - Easy installation and easy to clean
 - For indoor and outdoor applications
 - Made in USA
- See page 35 for custom mantel capabilities and 70 for custom mantel form.

Finish your fire.

Standard Materials

Tempered Glass

Tempered glass is used for all glass wind guards, burner covers, and fire glass. It has been heat-treated and is safe to use with our Crystal Fire® Plus burners. Untempered glass or glass that has not been heat-treated can explode when it reaches high temperatures and is not safe to use with gas fire pit tables.

Stucco

Stucco is used on many of our outdoor products and comes in many colors and finishes. Stucco is a low-maintenance and durable outdoor finish.

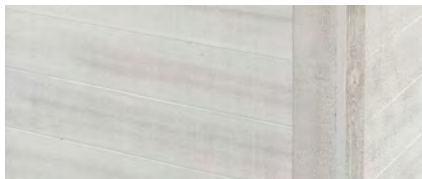

Supercast™ Concrete

Supercast is a proprietary blend of fiberglass and concrete to provide durability and strength. It is stronger and weighs less than traditional concrete. We have a variety of standard colors and finish looks. Custom options available.

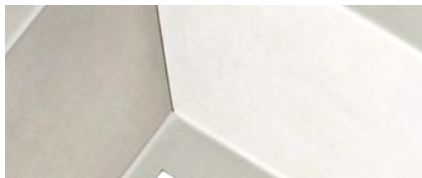

Everblend™ Concrete

Everblend is a process and material developed in-house and manufactured exclusively at The Outdoor GreatRoom Company. It is a weatherproof, concrete finish over a fiber cement and steel structure. The durability can be compared to any glass fiber reinforced concrete but is lighterweight for easier handling and installation.

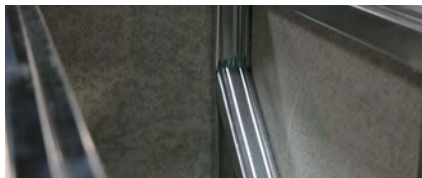

Wood

Appearance-grade, high-quality wood is used to create your dream design. Multiple stain options are available. Use wood to accent your look or complete your entire design.

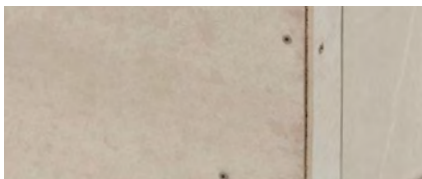

Stainless Steel

Crystal Fire® Plus burners, outdoor kitchen accessories, and finish trims are made from #304 stainless steel. #304 stainless steel is a high quality, commercial-grade metal.

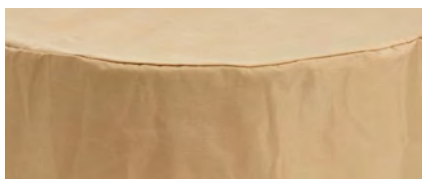

Steel Framing

Steel framing is used to build many of our gas fire pit tables, outdoor fireplaces, and custom outdoor kitchens. The framing is commercial-grade G90 marine grade galvanized stainless steel that is resistant to all rust and corrosion.

Hardiebacker®

Hardiebacker fiber cement boarding is used to build many of our fire pit tables, outdoor fireplaces, and custom outdoor kitchens. The board is non-combustible and resistant to mold and mildew, making it ideal for outdoor applications.

Rip-Stop Polyester

Polyester is used for all of the tan protective covers. The fabric provides one-way breathability: keeping exterior water away yet allowing interior moisture out. The covers feature tear-resistant, rip-stop laminating to further reinforce its strength and protection for the outdoors.

Frequently Asked Questions

Crystal Fire® Plus Burners and Gas Fire Pit Tables

Are these burners and fire pits UL listed? What does that mean?

Yes, all of our burners are UL and ULC tested and listed. This means they have passed numerous tests to ensure safe operation meet current ANSI standards. They have undergone extensive wind, rain, and clearance tests.

Can I roast marshmallows over my fire table or burner?

Yes you can; however, this appliance has UL listed as a decorative gas appliance, not a cooking appliance. Make sure that combustible items do not end up in the burner, as it will clog the burner ports and prevent proper operation.

Are there different Crystal Fire® Plus burner models?

We have 22+ different Crystal Fire® Plus burners and burner kits in stock. All of these can be purchased as one complete unit or individual components. Custom burners are also available. See pages 39-45 for our offering of burners, sizes, controls, etc.

What type of fuel can I use?

You can choose from either Liquid Propane (LP), or Natural Gas (NG). Most Crystal Fire® Plus burners and stocked fire tables come set-up for LP; however, a NG conversion kit included with each unit. If converting to NG, a certified gas technician should do the installation. When ordering an electronic ignition burner, you must specify LP or NG.

Can commercial burners be used in residential applications?

Yes, many homeowners desire an electronic ignition burner system as it allows them to control the burner at a switch away from the burner, as well as use optional upgrades like remote controls.

How many BTUs per hour are produced?

The BTU rating for each burner varies by size and fuel type. For exact BTU ratings, consult the burner manual.

Can I use my OGC fire table on a wood deck?

Yes, all OGC fire pits & fire tables are okay to use on a wood deck if clearances are met. Crystal Fire® Plus burners are UL, ULC, and CE tested and listed and are used in all of our outdoor fire pits. They are okay to use on concrete patios, wood decks, composite decks, etc.

What regular maintenance should be performed?

Regularly covering and cleaning your Crystal Fire® Plus burner will extend the life of the product and keep it performing at its best. Clean all loose debris, check fittings and tighten if necessary, ensure all gas lines are intact and free from obstructions, replace batteries in sparker if needed. Consult your manual for more information.

Can I operate my fire table with a smart device?

Yes, we offer a Bluetooth® smart app option for our direct spark ignition system. You may interface your automated home system with our electronic ignition burners too. Contact OGC for more details.

Is media included with the burners or fire tables?

Yes, we include clear tempered fire glass gems with each Crystal Fire® Plus burner unless otherwise noted. Various lava rock, crushed glass, and colored glass are also available.

If I purchase a burner for my own project, what else is needed?

That depends on the project and can vary from additional controls, media, etc. You will need to specify the fuel source (LP or NG) used if it is a commercial or custom burner. We recommend working with your local OGC dealer to determine what is needed for your project. You may also contact us at sales@outdoorrooms.com.

What happens to my burner or fire table when it rains?

If the burner or fire table is uncovered, water will drain through the perimeter of the burner pan. Water will not drain through the burner neck or build up in the burner — it will safely drain out the bottom of the fire table. All fire tables and burners are constructed of outdoor-rated, durable materials.

Do I need to cover my fire table when not in use?

It is not mandatory to cover the fire table, but is recommended. Our tables are constructed of materials made to withstand outdoor exposure; however, we do recommend covering if not using for extended periods. This will prevent any unwanted debris from falling onto the burner. There are optional protective covers available.

What is the difference between a commercial burner and a residential burner?

Commercial-rated burners are often required for commercial applications (hotels, restaurants, etc.). The OGC commercial burners are identical to the residential burners except they include electronic ignition (DSI), and emergency shut off switch, and need to be ordered specifically for NG or LP. In addition, they have more options available for controls either at the burner or away from the burner.

For more troubleshooting materials, visit www.outdoorrooms.com/product-support

Custom Outdoor Kitchens

What is the design and ordering process?

Start by completing the custom outdoor kitchen request form from either our catalog or website. From here, we will communicate throughout the process on pricing and revisions. The entire process can be completed in six weeks once everything is approved. Custom forms are available at www.outdoorrooms.com/custom.

What type of grills can be built in?

Any grill that has the appropriate installation kit or specifications can be used. This includes gas, charcoal, wood, and pellet.

Can I order a custom finish to match my home?

Yes, you can also order the unit unfinished and have it finished on-site to match your house and landscape by your local dealer, contractor, or landscaper.

What are the outdoor kitchens built from?

The structure begins with G90 (marine grade) galvanized steel framing. It is then wrapped in Hardiebacker® fiber cement boarding. From there it can be finished from a variety of materials, or left unfinished to be completed on-site.

Outdoor Fireplaces

Are additional sizes available for ready-to-finish fireplaces?

We offer the ability to make custom fireplaces to your specifications. It is most cost-economical to keep the firebox and burner dimensions standard and change the structure dimensions. If you desire a different size firebox, we likely have the ability to provide you with a solution.

Can I burn wood in any of these fireplaces?

No. These units are not wood-burning fireplaces. The benefits of a gas fireplace include a smoke-free experience, turn on instantly, and provide instant heat.

Can I run a ready-to-finish fireplace on a standard LP tank?

A standard 20 lb liquid propane tank is only available for use with the 40" model. Other models will burn through gas too frequently.

Is the fire pit or fireplace approved for use in screened porches, covered porches, gazebos, or lanais?

While the unit itself is not UL approved for this application, there should not be any problem provided the following guidelines are followed:

- A minimum of three walls are screened. Screens must be permanently open. They cannot have windows that can close.
- The screened walls must provide a minimum open area of 30%.
- All appliance ceiling and wall clearances must be met.
- Minimum porch area 96 square feet.

Furniture

How do I clean the fabric?

Most stains can be cleaned with mild soap and warm water. Blot the affected area and try to remove the stain with the cleaning mixture. For more detailed instructions, please visit www.sunbrella.com.

Do I need to store my cushions from the rain and/or winter?

The furniture is built to withstand a variety of weather conditions. You can choose to store them inside if you prefer that they are clean and dry to use.

Is the furniture rust-resistant?

Yes, due to the complete powder-coating process on the frames.

Gallery Indoor Fireplaces

What is the cost to operate the electric fireplace units?

Based on national average electricity costs, the cost to operate the flame and lights is less than one penny per hour. The cost to operate the heater is about 9 cents per hour on low and 18 cents per hour on high.

Are the electric fireplace units quiet?

Yes. They have a lightweight composite shaft for the fan/blower, making it very quiet.

How big of a room will the electric fireplaces heat?

While there are many factors to consider (insulation, outdoor temperatures, openness of the room, etc.), 5,000 BTUs should be adequate to heat a room that is about 10' x 20' (200 square feet) with an eight foot ceiling.

What happens if we leave the flame on the electric fireplaces?

The unit is under warranty for 10,000 hours (400 days+). There is a safety mechanism that prevents over heating if the heater is left on for extended periods. If you operate the fireplace for 4 hours a day, the LED lights should last at least six years.

Can the electric fireplace units be installed in a bathroom?

Yes. The fireplace should be located away from a wet/splash zone and away from direct steam.

For more troubleshooting materials, visit www.outdoorrooms.com/product-support

Warranty

See user manual for more information.

PRODUCT CATEGORY	WARRANTY INFORMATION
Gas Fire Pit Tables and Crystal Fire® Plus Burners	- Limited lifetime warranty on all stainless steel burners installed in a residential setting, and five years on all stainless steel burners installed in a commercial setting. - One year finish warranty - One year warranty on ignition & electronics - Three year structural warranty on all fire pit bases and top
