## OUTDOOR FIRE PITS AND FIREPLACES

The light from a fireplace extends the season for the outdoor living space you worked so hard to create.

Our Carol Rose Coastal Collection includes unique styles of traditional outdoor fireplaces, linear outdoor fireplaces, outdoor fire pits, and outdoor fireboxes that let you create your own systems with a traditional log set and burner or contemporary burner. With so many choices you are sure to find a fireplace that adds a perfect glow to your outdoor lifestyle.

All our outdoor hearth products feature stainless steel for all exterior surfaces to provide lasting beauty. Ask your dealer about products and services to keep your fireplace looking great for years – including stainless steel cleaner, weather doors, and annual service agreements.

These products are designed for outdoor installation only. For installation on a covered deck or porch, at least two sides of the enclosure must remain open at all times. Like any outdoor fire, these systems provide ambiance, light and just a touch of warmth.

## *Carol Rose*

These special outdoor products are named for customer service manager Carol Rose Burtz, who has been with Empire since 1959. As the first time we have named a product for an employee, this represents an appropriate honor recognizing Carol's exceptional history with the company.

# *fire pits*

## OUTDOOR FIRE PITS

---

A large linear fire pit creates an instant roaring fire – bringing light and beauty to any outdoor entertainment venue. Fire pits are available in 48-inch (55,000 Btu) and 60-inch (65,000 Btu) and features a precisely ported stainless steel burner concealed beneath a bed of crushed glass for consistent flame height and distribution.

Accessories include a drain tray, four-sided tempered glass wind deflector, and a stainless steel weather cover that installs with or without the wind deflector in place. A built-in sensor continuously monitors the flame and shuts off the gas if high wind or rain extinguishes the fire. When the clouds clear, you can relight the fire pit in seconds to continue the party.

LED-equipped systems require sufficient clear or translucent crushed glass to cover the burner and lighting system. Additional colors and shapes may be added as accents. Non-LED systems may use any color crushed glass. See installation manual for glass placement details.

# *inspiration*

## INSPIRATION IN COLOR

---

Even with no fire burning, your fire pit can chase away the darkness thanks to its built-in dual-strip multi-color LED lighting system mounted below the burner. Two intuitive buttons let you control the LED color and intensity. Or, set it to automatically cycle through all seven colors – at slow or moderate speed.

For applications where electric power is not readily available, base model fire pits are available without lighting.

*reliable*

## RELIABLE FOR PATIO, POOL, OR SEASIDE

---

With all visible surfaces made from 11-gauge marine-grade 316 stainless steel, our fire pits are built to withstand exposure to harsh environments. Rainwater flows through the fire pit onto the ground or into the available drain tray, which routes the water away. Both the valve and lighting system are designed for years of outdoor use.

# linear

## OUTDOOR LINEAR FIREPLACES

Stainless steel construction, an integrated LED lighting system, and a 55,000 BTUs burner ensure that Empire's 48-inch Outdoor Linear Fireplace will light up your patio for any occasion. Or choose the 60-inch with 65,000 BTUs burner.

These single sided and see-through outdoor fireplace models conceal a gas burner beneath a large bed of clear-frost crushed glass (required; sold separately). While the flames dance atop the bed of glass, the lighting system illuminates the glass from beneath. A glass deflector shield helps protect the flame from wind. (Optional taller deflectors are available for fireplaces installed in windier locations.)

A tilt-up cover conceals all controls – including pushbutton ignition and flame control knob with Hi, Medium and Low – plus intuitive buttons to control the changing pattern and color of the LED lighting. The buttons let you select from seven LED colors – Deep Blue, Royal Violet, Cardinal Red, Sea Green, Forest Green, Tranquil Blue, and White – and vary the intensity. Two program settings cycle through the colors automatically.

## *traditional* OUTDOOR TRADITIONAL FIREPLACES

This traditional fireplace features an all-stainless exterior. Inside the fireplace, a special stainless steel version of our popular Harmony burner lights up the night with 50,000 BTUs. The standard refractory liner and the required refractory Wildwood Log Set provide thermal mass to help minimize temperature fluctuations for your guests.

Both the 36-inch and the 42-inch fireplaces are rated at 50,000 BTUs, and conceal their valve and controls beneath the fireplace floor.

Choose Millivolt or IP, both available in propane or natural gas.

# fireboxes

## OUTDOOR FIREBOXES & BURNERS

---

Think of our outdoor firebox as the canvas that lets you create your ideal fireplace. Built using the same rugged construction as our fireplaces, the outdoor firebox is a ventless design that's certified for use with an outdoor burner.

The optional stainless steel drain pan is available to help control and redirect any moisture that collects beneath the fireplace. Protect your fireplace with the available weather doors.

## TRADITIONAL BURNER & WILDWOOD REFRACTORY LOG SET

---

Our outdoor burners allow you to convert your existing outdoor fireplace into a convenient gas system. The result? You spend more of your time entertaining friends and family in your outdoor living space, and less time trying to maintain a wood fire.

The Carol Rose Coastal Collection includes the Wildwood Refractory Log Set designed specifically for outdoor use with our Harmony Stainless Steel Burner. Both the 24-inch and 30-inch burners are rated at 50,000 BTUs to generate plenty of flames to complement the massive concrete log sets. These special burners feature internal baffles to induce movement in the flames for an exceptionally natural looking fire.

Choose Millivolt or Intermittent Pilot. Available in Propane or Natural Gas, these burners are designed for installation in an outdoor fireplace or firebox only.

# Contemporary

## CONTEMPORARY BURNERS

Our contemporary burner completes your modern outdoor décor by providing a modern twist on the outdoor fireplace. With a stainless steel top and linear burner, these attractive systems deliver up to 40,000 BTUs – plenty of fire to light up your outdoor space.

Available in IP only – in Propane or Natural Gas. These burners are designed for installation in an outdoor fireplace or firebox only
